Educational Management  
(Computer Science)

- Gained a solid foundation in Computer science and the software development cycle.

# James Ohakwe

## Full Stack Software Engineer

MongoDB | Express | React | Node

Lagos, Nigeria

## Summary

I am a results-driven Full Stack Software Engineer, specializing in M.E.R.N. (MongoDB, ExpressJs, ReactJs, NodeJs ) with experience working on wordpress, UI/UX, frontend and backend platforms.

My interest in programming is motivated by curiosity and the possibility of finding simple and unique solutions to complex problems using tech. With a background in computer science gotten from my bachelor's degree, more than two years full stack experience, strong communication and leadership skills, I can handle tasks unsupervised, collaborate effectively in a team, set goals and lead a team to achieve those goals.

My hobbies include playing basketball and the guitar. I also love watching sci-fi-movies and reading books; I am currently reading Goals by Bryan Tracy.

## Work Experience
