- Lead my team to win the cup as champions of the inter-house sports along with other trophies.
- I won the medal for the most valuable House master.

James Ohakwe

Full Stack Software Engineer

MongoDB | Express | React | Node

Lagos, Nigeria

Summary

If what you are looking for is not just the best software engineer but also a problem solver, a superb team player or daring leader and a winner with a proven track record of winning, then I am your guy.

I am a results-driven Full Stack Software Engineer, specializing in M.E.R.N. (MongoDB, ExpressJs, ReactJs, NodeJs) with almost 3 years' experience. I also have about 6 years' experience working as a tech lead on WordPress, Graphics, frontend and backend platforms. I create modern and sleek user friendly web solutions.

However, my tech skills do not limit me in my quest for finding solutions to problems.

Although I am very confident in my skills, I am a very fast learner. I can learn technologies faster than your average programmer and I can adapt into any work culture.

My super powers lie in problem solving and emergency deliveries. I love problems.

Over the years I have helped several teams get through mad rushes, Unrealistic goals, impossible deadlines and hard times with down-to-earth, on-time solutions to problems.

I possess the ability to thrive under pressure, having a clear view of the goals set and a diehard mentality to stick to the problems till I find the solutions, or lead a team to achieve those goals.

I love playing basketball. I love reading too. I am currently reading "Goals" by Bryan Tracy.

Work Experience

Workmate Team | Aug 2022 - present

Full-stack Software Developer

- Managing cutting-edge technologies to improve applications.
- Developing functional and sustainable web applications with clean codes.
- Leveraging Node and React JS to build management systems.
- Writing scalable and secure restful APIs for frontend consumption.

Orglearning Consult | Jan 2019 - Jul 2022

Tech lead (Full-stack developer)

- I lead a team to develop and maintain educational web applications with portal services, students database management and payment systems along with real-time assessment and result viewing.
- The school I was assigned to won the best primary school in Lagos state, Nigeria, 2019. It also went on to make a lot of returns that year which resulted in the opening of another branch.
- Lead the team that helped schools handle the emergency of the Covid19 pandemic. We integrated technology to make teaching/learning seamless.
- I also worked as a Fullstack developer, Network administrator, and social media manager.

Rescripting consult | Jul 2016 - Nov 2018

Wordpress Developer

- Delivered wordpress websites and implemented technologies that met needs of schools we consulted for.
- The school assigned to me won the prize for the best primary school in the local government area for three consecutive years. Then also won "the future awards Nigeria" for schools in 2018
